

Commander's Intent

Vision

As commander of Plano Mustangs Composite Squadron, within the best of my ability, I will provide a safe, welcoming, and diverse environment of transparent professionalism for all members to develop personal professional growth through Civil Air Patrol's Core Values: Integrity, Volunteer Service, Excellence, and Respect.

Mission

Plano Mustangs Composite Squadron focuses on Civil Air Patrol's three main missions:

AEROSPACE EDUCATION: To provide an environment to Civil Air Patrol members and the local community to spread awareness, training, and growth opportunities within STEM career paths and subject matters.

CADET PROGRAMS: To mentor young growing teenagers to become high quality leaders for tomorrow's America through means of physical education/training through fitness exercises, character/moral development through Values for Living, leadership symposiums through multiple angles of role-model development and servant leadership modeled after the United States Air Force, and aerospace opportunities through exploring different topics such as aviation, space and technology.

EMERGENCY SERVICES: To train and prepare members with the highest quality of experiences to become mission-ready for any assistance as requested by local first-responders, United States Air Force, and the CAP National Operations Center.

End State

While we live in an ever-changing society, it is important that we understand how to be vigilant for personal and team success. As a squadron, every member that represents the squadron is a key stakeholder towards carrying out the aforementioned goals. Each member will be valued as time is delicate and individualized experiences help bring missions into reality. We as a team must strive towards performing with excellence while personally achieving growth and success. The squadron commander will be transparent, adaptable, and consistent with opportunities for positive growth.

Semper Vigilans,

CHRISTOPHER J. CRISMON
Captain, Civil Air Patrol
Commander
